

New underwriting modules now available - Oct.6, 2015

Submitted by Anar on October 7, 2015 - 11:19am

Advocis is now offering LOGiQ³'s underwriting modules ? 27 training modules that cover topics including medical, non-medical and financial risks. The topics are designed to educate each student on the possible outcome of the risks as well as the favourable and unfavourable case scenarios that can occur. These accredited e-learning modules, which are available through the Advocis Learning Centre, give advisors the advantage of knowing how an underwriter thinks and delivers the specific information required for risk selection.

New underwriting modules now available

Advocis is now offering LOGiQ³'s underwriting modules ? 27 training modules that cover topics including medical, non-medical and financial risks. The topics are designed to educate each student on the possible outcome of the risks as well as the favourable and unfavourable case scenarios that can occur. These accredited e-learning modules, which are available through the Advocis Learning Centre, give advisors the advantage of knowing how an underwriter thinks and delivers the specific information required for risk selection.

We're pleased to partner with LOGiQ³ on this new initiative ? an expert provider of life insurance and reinsurance consulting and outsourced services. For **CE accreditation** these 27 **underwriting modules** are being offered at 20 per cent off. Don't delay this offer ends November 30, 2015! Please use the discount code: ADVOCIS_OCT20. This program is being offered through LOGiQ³

By offering our own quality education programs as well as partnering with other quality education providers we can provide practical and relevant education updates to our advisors on the advisor's professional practice and needs. Therefore you will need to update your CE credits on the CE tracking system, as you would with any non-Advocis program.
